

DETERMINING BRACELET SIZE

- Using a flexible measuring tape*, measure the circumference of your wrist just above the wrist bone (toward the elbow).
- Make a note of the number at the point where the measuring tape meets the 0.
- Compare your measurement to the chart below, and choose the corresponding bracelet size. If you appear to be in-between two sizes, we suggest you choose the "Custom Size" option and include your measurements in the checkout notes.

DETERMINING BANGLE SIZE

- Close your fingers together and bring your thumb to your little finger. Pretend that you were putting on a bangle.
- Wrap a flexible measuring tape* around your hand at the widest point. That will be the circumference of your hand. Make a note of the number at the point where the measuring tape meets the 0.
- Compare your hand circumference to the chart below. If you appear to be in-between two sizes, we suggest you choose the "Custom Size" option and include your measurements in the checkout notes.

*If you do not have a flexible measuring tape, use a strip of paper, ribbon, or string and mark it where it overlaps on your wrist for a bracelet or at your widest point for a bangle. Then measure the length against a ruler.
